453, Govind Colony Indore India (M.P.) 452015

Professional Summary

Motivated Software Engineer seeking opportunities in the IT industry to apply technical expertise with additional experience in designing, problem-solving skills, and determination in building scalable, efficient, and innovative solutions.

Educational Qualification

- **Integrated MCA** (2020–2025) – Acropolis Institute of Technology & Research (AITR), Indore. (RGPV), **CGPA: 7.86/10**

Technical Skills

- **Languages:** JavaScript (ES6+, OOJS), HTML5, CSS.
- **Frameworks & Libraries:** React.js, Tailwind CSS, Bootstrap, Context API.
- **Backend & Systems:** Node.js, Express.js, RESTful Web Services (AJAX, HTTP request flow).
- **Databases:** MySQL (SQL), MongoDB.
- **DevOps & Cloud:** Render, Vercel, CI/CD, Docker.
- **Tools:** Git, GitHub, Postman, VS Code.
- **Design Skills & Tools:** Wireframing, Prototyping, User flow Design, UI/UX, Figma.

Work Experience

Almanet Professional Services (May 2025 – Oct 2025)

Role: Software Developer Intern (Mern-Stack Developer & UI/UX)

- **Design & MERN-Stack Coding:** Owned the end-to-end delivery of a real-time Nutritionist Application, from designing wireframes/user flows in Figma to writing clean, production-ready React and Node.js code.
- **UI/UX to React Conversion:** Collaborated closely on UI design and successfully translated complex static prototypes into fully functional, responsive React components using ES6 JavaScript.
- Designed the project's official logo and proposed a meaningful project name, which is currently used by the company.

Projects

Full-Stack Airbnb Clone (Node.js, Express, MongoDB, EJS) | [\[GitHub\]](#)

- Built a **full-stack** Airbnb clone with features like listings, JWT authentication, edit listings, image uploads, and dynamic map/location display. Handling complex asynchronous AJAX/RESTful API requests seamlessly.
- Applied **Model-View-Controller** (MVC) pattern to separate routing, resulting in a more maintainable, modular, and scalable application structure and server-side **Geocoding** using Map box to convert user-entered locations into latitude/longitude coordinates, enabling accurate **map placement**.
- **Mapbox** markers that dynamically display listing details (title, price, location) on map.

Real-Time Video Conferencing Application | [\[Live Demo\]](#)

- Built a real time video conferencing web application using **WebRTC** & deployed it on render.
- Ideated and crafted the complete UI/UX layout in Figma, ensuring an intuitive interface, and single-handedly transformed the design into a live pixel-perfect web application.
- Added **real-time chat functionality** inside meetings using **Socket.io**.
- Built screen-sharing functionality using the **Media Stream** API.

Courses & Certifications

- Apna College Full Stack Web Development.
- IBM UI/UX Certificate (August 2024 – December 2025)

Achievements

- Awarded a laptop and a cash prize of ₹36,000 by the **Chief Minister's House (CM House)** for excellence in creative arts.
- Achieved **First Position in the Team Idea Lab competition** conducted by my college.
- Secured **First Position in the Art & Sketching Competition** organized by my college.
